

## Lots of Love to Share

*We've been fortunate to have shared our home  
with many wonderful bunnies over the years.*

Most folks know of our love for bunnies. We hope to educate and better inform people on how to better take care of these warm, furry little creatures.

Our goal is to provide information and resources to help you with the care of your new family member.

Bunny Rabbits are very loving, charming and make wonderful pets. Each Bunny (Bunn) has its own personality, just like people. Rabbits are intelligent and very social. They require mental stimulation, toys, exercise, environmental activity, and interaction from his new human family and his new siblings (other bunnies and/or other animals).

We try to find the right match for both you and your family to the right Bunn. Please take a moment and familiarize yourself with these adorable creatures. We try to inform you of a bunny's personality and screen folks ahead of time to avoid a bunn becoming ignored, neglected, abandoned, or discarded.

For a fantastic reference book, please pick up the NEW 4th Edition of the *House Rabbit Handbook* available from [Leith Petwerks](#)
